Draft for discussion

Kestrel Foods: closing a £210m growth gap by 2030

Momentum case, growth options and a plan to reach £1,200m revenue

Kestrel Foods Executive Committee | 24 November 2026 | Strategy team

Momentum takes revenue to £990m by 2030; five initiatives worth £210m reach our £1,200m ambition

Revenue grows 4.2% a year on momentum, to £990m in 2030

- That is £210m short of the £1,200m ambition
- Closing it needs 9.3% a year, double the current rate

We tested three routes: core only, a balanced portfolio and acquisition-led

- The balanced portfolio scores 3.3 out of 4
- Core only cannot close the gap; acquisitions cost £420m

The balanced portfolio closes the gap for £180m of investment

- Five initiatives: online direct, international, premium range, pricing and a bolt-on
- Payback is 4.5 years

Delivery runs in three phases from 2027 to 2030

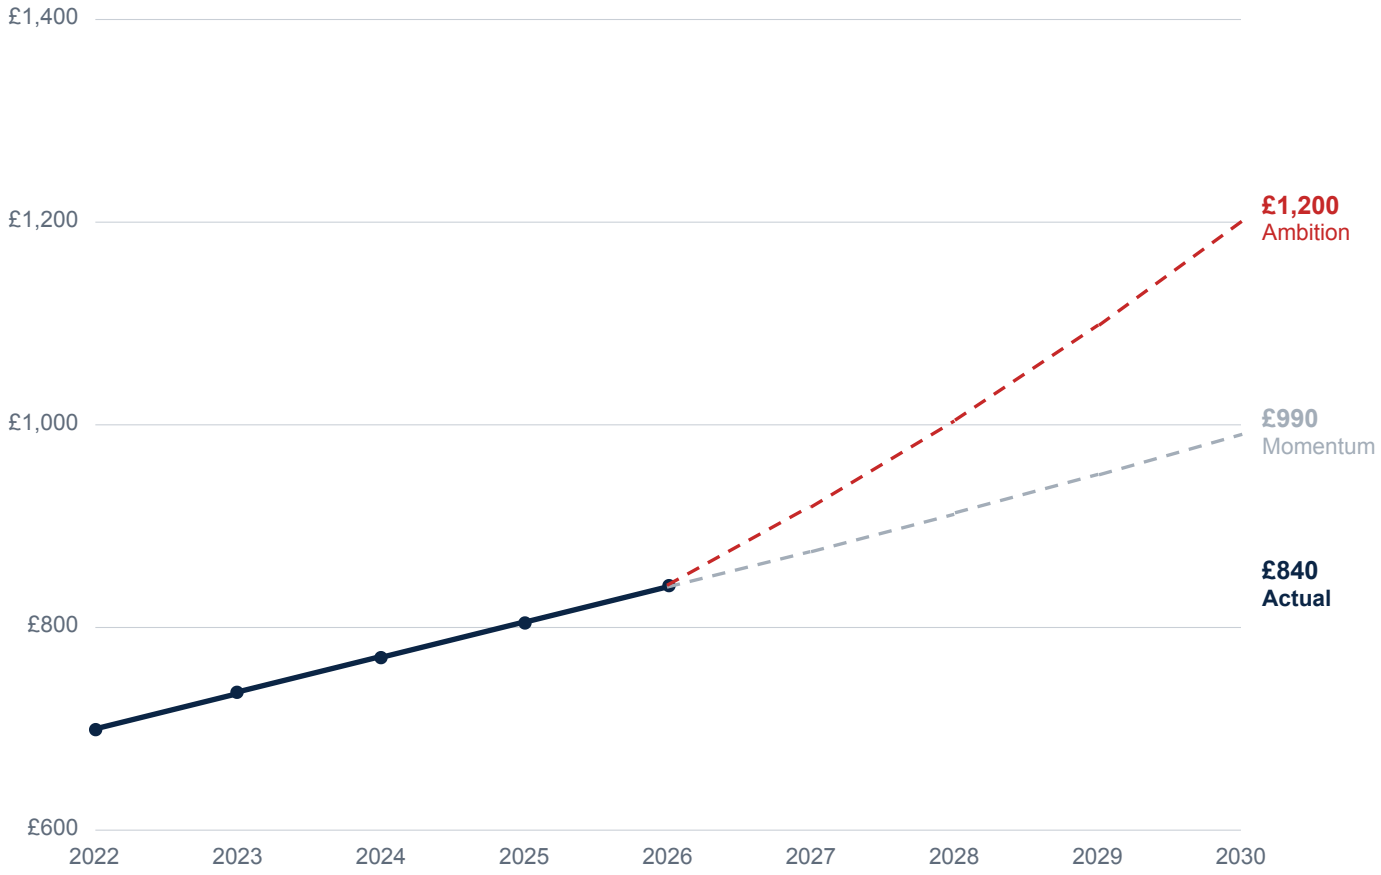

- Pricing and premium range deliver first
- International and the bolt-on carry the most risk

1. Revenue is net sales in nominal pounds. Momentum case assumes the 2023 to 2026 growth rate continues.
Source: Kestrel Foods finance data 2022 to 2026 and 2027 plan; strategy team analysis. Fictional example.

At current momentum, revenue reaches £990m in 2030, leaving a £210m gap to the ambition

Net revenue: actual, momentum and ambition

£m, nominal, 2022 to 2030

What the chart shows

1. Growth has slowed from 5.0% in 2023 to 4.3% in 2026.
2. The ambition needs **£1,200m** in 2030, **£210m** above momentum.

1. Momentum is 4.2% a year from 2026; ambition is 9.3% a year, compounded.

Source: Kestrel Foods finance data 2022 to 2026 and 2027 plan; strategy team analysis. Fictional example.

The balanced portfolio scores 3.3 out of 4 and closes the full gap for £180m, less than half the cost of buying

Long list (6) → **Screened (3)** → **Evaluated** → **Recommendation**

	Weight	**Option A** Core only (£45m)	**Option B** Balanced portfolio (£180m)	**Option C** Acquisition-led (£420m)
Closes the £210m gap	30%	◔	●	●
Investment needed	20%	●	◕	◔
Payback	15%	◕	◕	◔
Execution risk	20%	●	◕	◔
Fit with capabilities	15%	◕	◕	◕
Weighted score		**2.8**	**3.3**	**2.2**

○ Weak ◔ ◑ ◕ ● Strong

Rationale

- Option A adds only £65m, so revenue stops at £1,055m
- Option C closes the gap but costs £420m and carries integration risk
- Option B reaches £1,200m with one small acquisition, not two large ones
- It builds on the pricing and premium range the team already runs

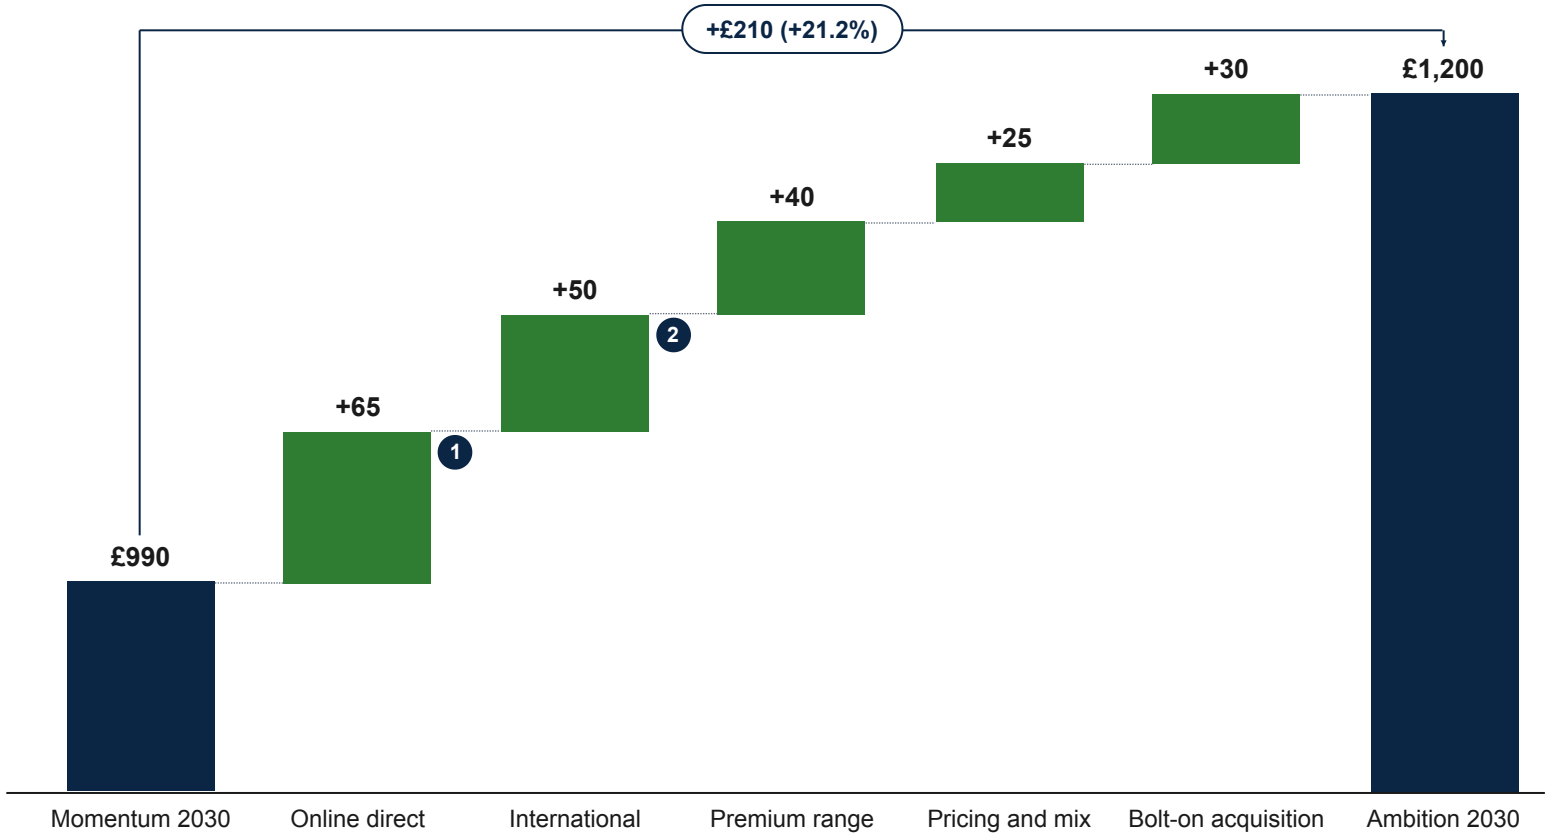

We recommend Option B: approve the balanced portfolio and release £25m for 2027

1. Scores run from 0 (poor) to 4 (strong). Weighted scores: A 2.8, B 3.3, C 2.2. Investment is cumulative 2027 to 2030.
Source: Kestrel Foods finance data 2022 to 2026 and 2027 plan; strategy team analysis. Fictional example.

Five initiatives add £210m of revenue by 2030, and online direct and international deliver over half of it

Bridge from momentum revenue to ambition, 2030

£m, nominal, 2030

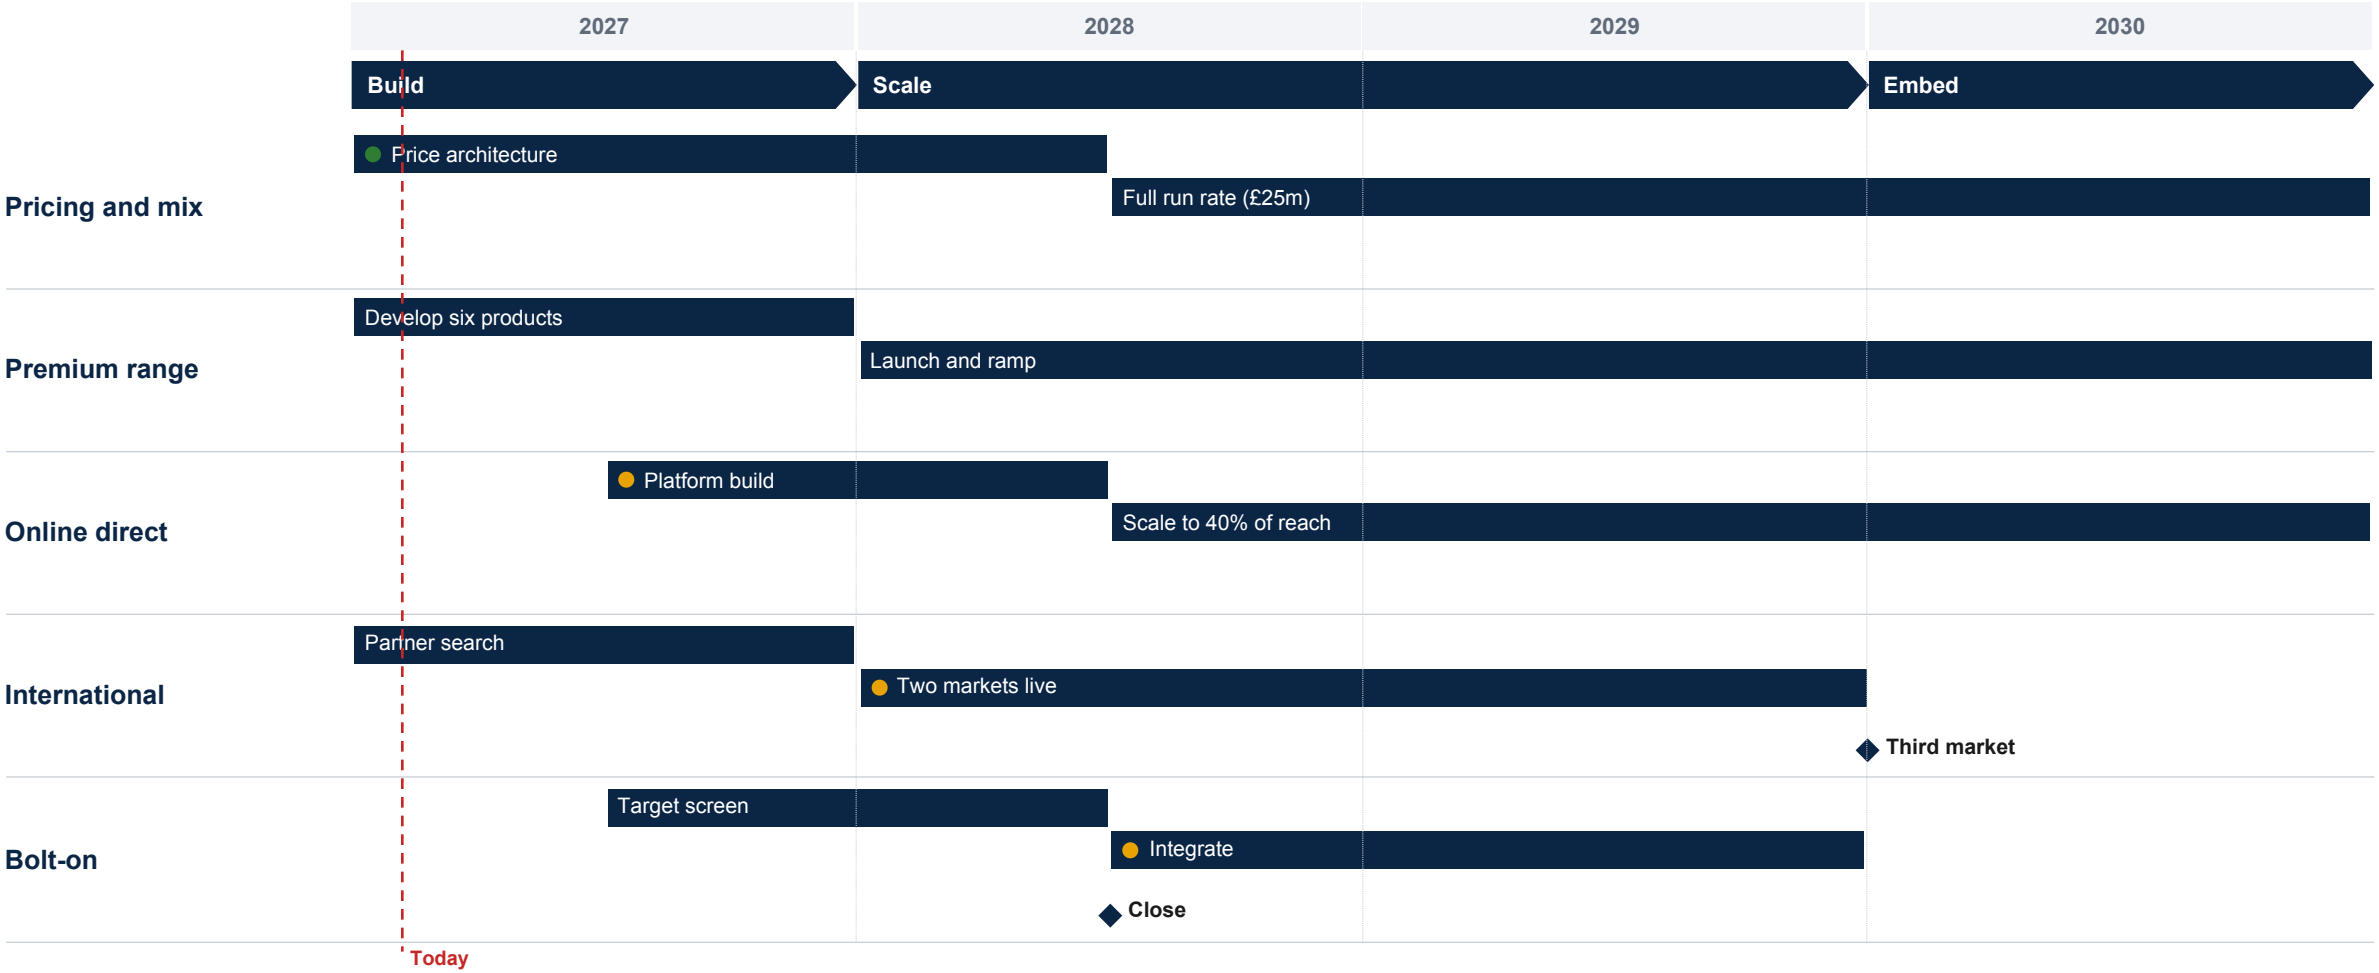

What the bridge shows

1. Online direct and international add **£115m**, 55% of the gap.
2. Pricing and mix is the smallest step and the least risky.

1. Vertical axis starts at £900m. Initiative values are 2030 revenue, net of overlap between initiatives.

Source: Kestrel Foods finance data 2022 to 2026 and 2027 plan; strategy team analysis. Fictional example.

Pricing and premium range deliver in 2027, while international and the bolt-on take until 2029 to reach full effect

1. Periods are calendar years. Bars show build and ramp-up; milestones show launch dates.
