Draft for discussion

Calder Valley Homes: a simpler organisation built around tenants

Design principles, target structure, decision rights and transition plan

Calder Valley Homes Board and Executive Team | 25 November 2026 | Transformation team

Confidential and proprietary. For internal discussion only.

We propose five divisions in place of nine directorates, saving £4.8m a year with 90 fewer posts by 2028

Tenants wait too long because nine directorates share each decision

- A repair needing two directorates takes 23 days on average
- Six management layers separate tenants from the Chief Executive

Four principles guide the design

- One owner per tenant outcome
- Decisions taken close to tenants
- Fewer layers
- Common services shared

The target model has five divisions and five layers

- Average span of control rises from 4.1 to 7.0
- Headcount falls from 1,240 to 1,150 FTE: 60 vacancies and 30 voluntary exits

The new structure goes live on 1 July 2027

- Costs £3.1m to achieve; payback in 8 months from full run rate
- Repairs and tenant contact keep running throughout

1. Headcount is full-time equivalents (FTE). All changes follow the association's consultation policy and are subject to it.

Four design principles guide every choice in the new operating model

One owner per outcome

- Each tenant outcome has one accountable director
- Repairs, rent and neighbourhoods each have a single owner
- No outcome is shared between three directorates

Today
2 of 8 outcomes owned

Target
8 of 8

Decide close to tenants

- Area managers decide repairs priorities and allocations
- Directors decide only what crosses areas
  - Spend limits rise from £5k to £25k for area managers

Today
23 days to close

Target
14 days

Fewer layers, wider spans

- Five layers from Chief Executive to front line, down from six
- Average span of 7 reports, up from 4.1
- No manager with fewer than 5 reports

Today
Span 4.1; six layers

Target
Span 7.0; five layers

Share common services

- Finance, people, digital and data serve all divisions
- One housing system replaces four
- One performance dashboard, updated weekly

Today
Four systems

Target
One system

Today nine directorates share tenant outcomes; the target model gives each outcome one owner

	Today	From 1 July 2027
Structure	Nine directorates, each with its own management team	**Five** divisions: homes, property, finance, people, digital
Layers	Six layers from Chief Executive to front line	**Five** layers
Span of control	Average of 4.1 reports per manager	Average of **7.0** reports per manager
Repairs	Three directorates touch each job; 23 days to close on average	One owner end to end; target **14** days
Systems	Four housing systems that do not share data	One housing system and one weekly dashboard

1. Spans and layers from the HR system, October 2026. Repairs times from the repairs system, January to September 2026.
Source: Calder Valley Homes HR and finance data, October 2026; staff workshops; transformation team analysis. Fictional example.

The target structure has five divisions reporting to the Chief Executive, with six neighbourhood area teams in Homes

1. Roles only. Names and appointments follow the Board's approval and the formal consultation.

Decision rights move to area managers and divisions, and every decision keeps one accountable owner

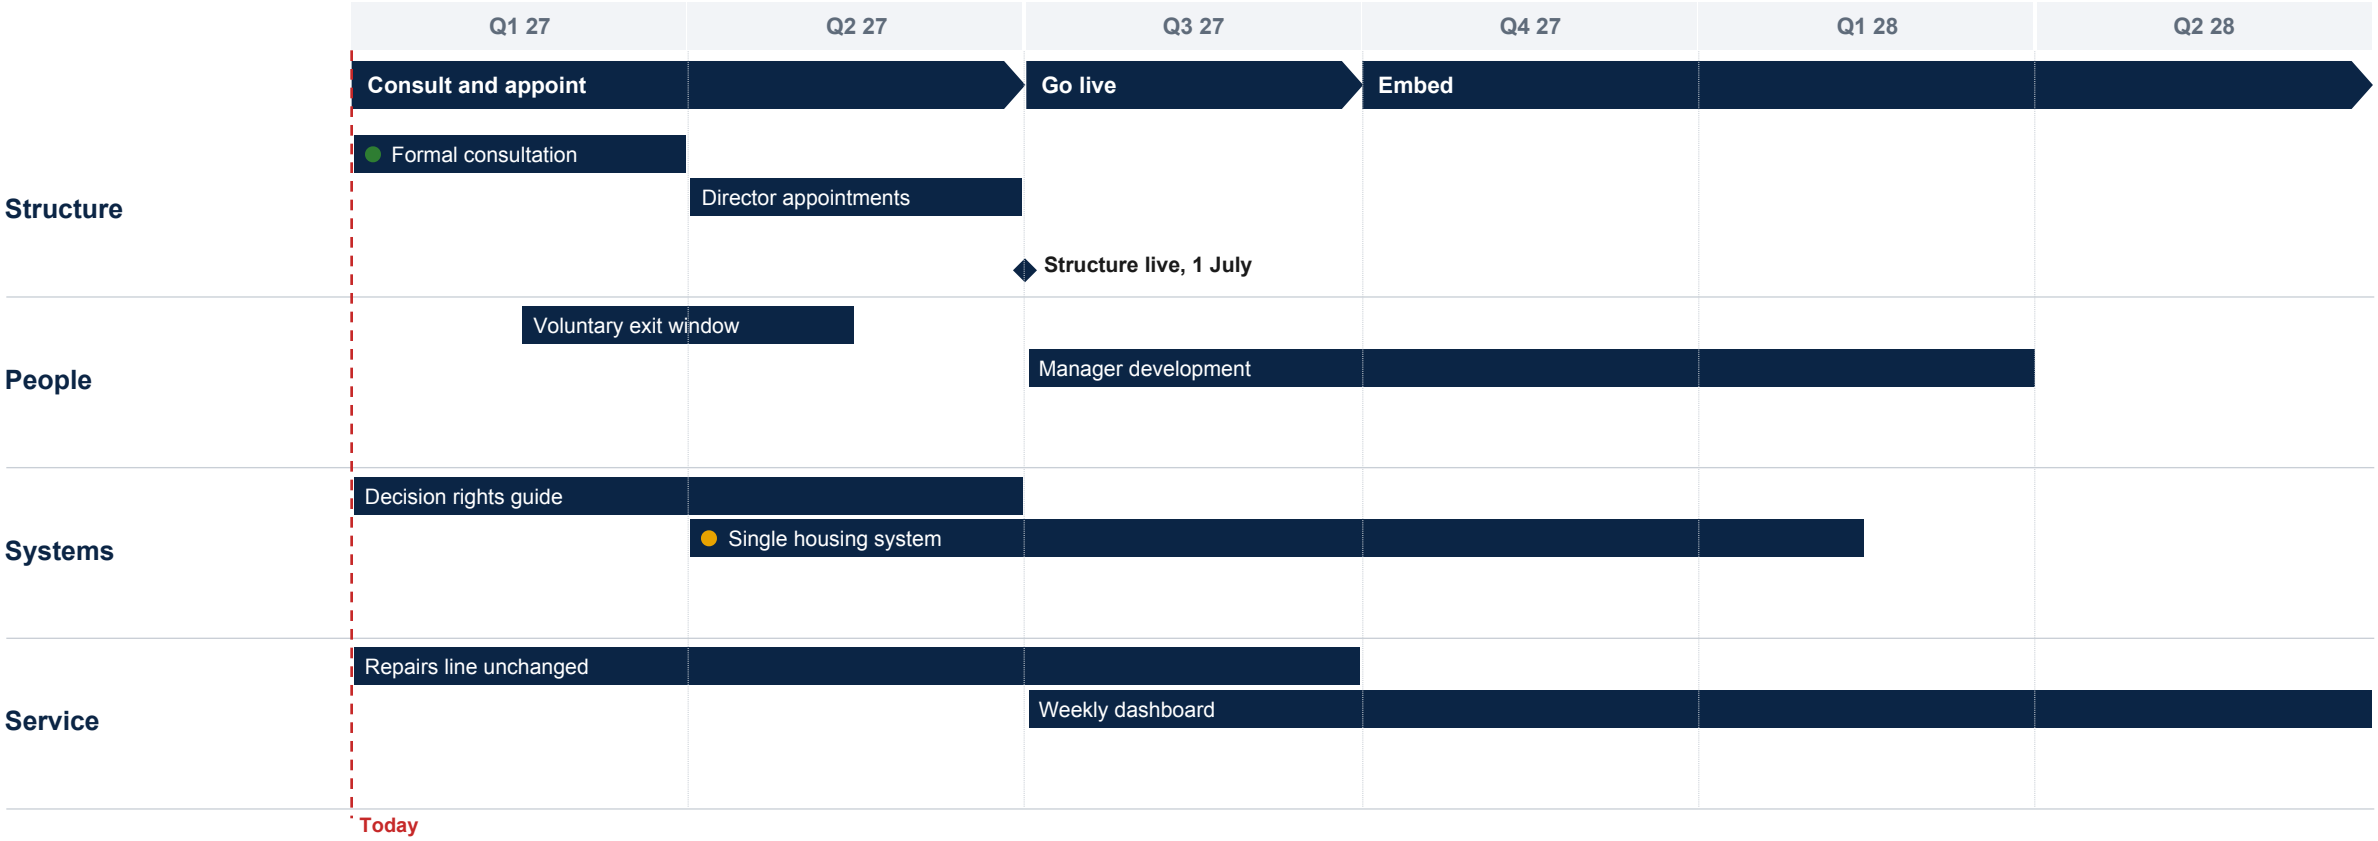

Activity or decision	Board	Chief Executive	Division directors	Area managers	Finance
Approve the annual budget	**A**	**R**	C	I	**R**
Approve spend over £250k	I	**A**	**R**	I	C
Set repairs priorities		I	**A**	**R**	C
Allocate homes to tenants		I	**A**	**R**	
Recruit to posts within budget		I	**A**	**R**	C
Agree rent increases	**A**	**R**	C	I	**R**
Approve new housing development schemes	**A**	**R**	**R**	I	C
Change the housing system configuration		I	**A**	C	C

R Responsible **A** Accountable (one per row) **C** Consulted **I** Informed

1. R = responsible, A = accountable, C = consulted, I = informed. Each decision has exactly one A.

Transition takes twelve months: consult in early 2027, go live on 1 July and embed through 2028

1. Quarters are calendar quarters. Go-live follows Board approval in December 2026 and formal consultation.
